Understanding Your Annual Performance Report (APR)

2009-2010

2009 4th Cycle APR

Version 9

Updated 11/09/2009

A guide to the sources and calculations used in developing your APR

TABLE OF CONTENTS

SCORING GUIDE MEASURES	1
STANDARD 9.1 INDICATORS 1, 2, 3, 4, 5 AND 6 (MAP)	3
GAP BONUS POINTS	8
MINORITY CALCULATION	9
FREE AND REDUCED-PRICE LUNCH CALCULATION	9
BONUS ACHIEVEMENT STANDARD	10

COLLEGE PLACEMENT CALCULATION (9.4.3)	21
CAREER EDUCATION PLACEMENT CALCULATION (9.4.4)	22
COLLEGE AND CAREER EDUCATION PLACEMENT CALCULATION (9.4.3 AND 9.4.4 COMBINED)	24
GRADUATION RATE CALCULATION (9.5)	26
ATTENDANCE CALCULATION (9.6)	28
SUBGROUP ACHIEVEMENT CALCULATION (9.7)	30
POST-ELEMENTARY SCHOOL GPA CALCULATION (K-8 DISTRICTS ONLY) (10.1)	31
SCORING GUIDES	33
VOLUNTARY SUBJECT AREA BONUS POINTS - SCIENCE	40
K-12 DISTRICT SUMMARY EXAMPLE	47
K-8 DISTRICT SUMMARY EXAMPLE	50
PROCEDURES FOR MAKING CORRECTIONS	53
NOTES	54

The Department of Elementary and Secondary Education does not discriminate on the basis of race, color, national origin, sex, disability, or age in its programs and activities. Inquiries related to Department programs and to the location of services, activities, and facilities that are accessible by persons with disabilities may be directed to the Jefferson State Office Building, Civil Rights Compliance (Title VI/Title IX/504/ADA/Age Act), 5th Floor, 205 Jefferson Street, Jefferson City, MO 65102-0480; telephone number 573-526-4757 or Relay Missouri 800-735-2966.

SCORING GUIDE MEASURES

During the 4th Missouri School Improvement Program (MSIP) Cycle, performance determines the accreditation level of a school district. Performance standards will be evaluated using status and progress measures to determine if a standard is met. Status and progress points are combined to determine if a standard is met, unless no progress points are possible. Progress points toward meeting a standard are earned for the method awarding the maximum number of points for the district.

The detailed scoring guides for each performance standard are outlined in the section titled "SCORING GUIDES".

STATUS MEASURES

Status measures the district's level of achievement based upon a five-year average of performance data, unless five years of data are not available. Status is divided into five levels as follows:

High 1 - 1 standard deviation above the mean for the state

High 2 - 1/3 of 1 standard deviation above the mean for the state

Average – Mean for the state

Below Average -1/3 of 1 standard deviation below the mean for the state

Floor – 1 standard deviation below the mean for the state

Note: The status levels for the Attendance and Career Education Course standards were established at 1/3 of 1 standard deviation below the levels cited above. The status levels for grade level MAP assessments were lowered in 2007 by .175 from the 2006 levels.

PROGRESS MEASURES

Progress measures the district's improvement over a five-year period. Progress is measured in the following ways: **Annual** – This method measures improvement from year to year. **Rolling Average** – This method measures improvement by comparing two-year averages. Years 1 and 2 are averaged, years 2 and 3 are averaged, years 3 and 4 are averaged, and years 4 and 5 are averaged; these averages are then compared to determine the amount of improvement.

Example:

Grades 3-5 Math	Year 1	Year 2	Year 3	Year 4	Year 5
Index Score	195.6	192.1	196.8	209.6	213.9

For the above scores, the rolling average would be calculated as follows:

> STEP 1 – Add the score for each year to the score for the following year.

Years 1 and 2: 195.6 + 192.1 = 387.7 Years 2 and 3: 192.1 + 196.8 = 388.9 Years 3 and 4: 196.8 + 209.6 = 406.4 Years 4 and 5: 209.6 + 213.9 = 423.5 > STEP 2 – Divide each of the preceding sums by 2 to determine the two-year average.

Years 1 and 2: $387.7 \div 2 = 193.85$ Years 2 and 3: $388.9 \div 2 = 194.45$ Years 3 and 4: $406.4 \div 2 = 203.2$ Years 4 and 5: $423.5 \div 2 = 211.75$

> <u>STEP 3</u> – Compare the two-year averages to determine the number of scoring points earned using the rolling average method.

Grades 3-5 Math	Yr 1-Yr 2	Yr 2-Yr 3	Yr 3-Yr 4	Yr 4-Yr 5
	Average	Average	Average	Average
Two-Year Average	193.85	194.45	203.2	211.75

For grade span math, a district earns 4 progress points for each increase of 2 index points or more on the rolling average. In this example, the index score increases by .6 from the first to the second comparison, by 8.75 from the second to the third comparison, and by 8.55 from the third to the fourth comparison. A district with these scores would earn 8 progress points using the rolling average method.

3 over 2 - This method measures improvement by comparing the average of the latest 3 years of data with the average of the first two years of data.

Example:

Grades 3-5 Math	Year 1	Year 2	Year 3	Year 4	Year 5
Index Score	195.6	192.1	196.8	209.6	213.9

For the above scores, the 3 over 2 method would be calculated as follows:

> STEP 1 – Add the score for the first two years of data and the latest 3 years of data.

Years 1 and 2: 195.6 + 192.1 = 387.7

Years 3, 4 and 5: 196.8 + 209.6 + 213.9 = 620.3

➤ <u>STEP 2</u> – Divide preceding sums for years 1 and 2 by 2 and the sum for years 3, 4, and 5 by 3 to determine the average.

Years 1 and 2: $387.7 \div 2 = 193.85$ **Years 3, 4 and 5:** $620.3 \div 3 = 206.8$

➤ <u>STEP 3</u> – Compare the two-year average and the three-year average to determine the number of scoring guide points earned using the 3 over 2 method.

Grades 3-5 Math	Yr 1-2 Average	Yr 3, 4, & 5 Average
Average Index Scores	193.85	206.8

For grade span math, a district earns 8 progress points for an increase of 6 index points or more on the 3 over 2 method. In this example, the index score increases by 12.95 index points. A district with this score would earn 8 progress points using the 3 over 2 method.

Standard 9.1 Indicators 1, 2, 3, 4, 5 and 6 (MAP)

Source of data used in the Missouri Assessment Program (MAP) calculation: Data are obtained from CTB McGraw-Hill, which is the contracted testing publisher for the grade-level assessments; from Riverside Publishing Company(RPC), which is the contracted testing publisher for the end-of-course assessments; and from the Assessment Resource Center (ARC), which is the contracted testing publisher for the Missouri Assessment Program-Alternate (MAP-A). These data files are used to create online reports for district use.

Notes:

- If the MAP testing schedule is reconfigured, the MAP scoring guidelines may be redesigned to maintain the continuity of MAP measurement for MSIP purposes.
- All MAP performance data are reported to the nearest tenth.
- MAP data for K-8 districts include only two grade spans (3-5 and 6-8).

MEASURING MAP

The MAP Performance Index (MPI) is used to evaluate MAP performance. The index approach calculates the movement of students throughout all MAP achievement levels. Data are analyzed by grade span (3-5, 6-8, and 9-11) for each subject area using status and progress measures. During the fourth cycle of MSIP, more than five years of test data will be analyzed to account for implementation of the state's new assessment systems beginning in 2006 for all grade spans and again in 2009 for grade span 9-11. Throughout the cycle, the weight of the test data will gradually shift from the majority of the points being awarded for the grade span test data in the beginning of the cycle, to the majority of the points being awarded for the grade level and/or end-of-course test data by the end of the cycle. In 2009, the points for grade span 9-11 will be distributed among grade-span, grade-level and the end-of-course assessment data. In 2010, the points for grade span 9-11 will be awarded using grade-level and end-of-course data.

The status and progress methods are applied to each subject in each grade span. The progress method can only be applied when the same assessment is administered for two or more consecutive years. The method awarding the maximum total points from status (High 1, High 2, Average, Below Average, and Floor) and from progress (Annual, Rolling Average, and 3 over 2) is used for each subject area. The subject area/grade span standard is considered "met" for grades spans 3-5 and 6-8 if the grade level and grade span test data combined total 40 status points, 50 status plus progress points, or 40 status plus progress points and the bonus gap is met. The subject area/grade span standard is considered "met" for grade span 9-11 if the grade span, grade level, and end-of-course test data combined total 40 status points or 50 status plus progress points.

Exclusions

Scores for ELL students who have been in the United States three years or less are disaggregated if the district codes a student as LEP/ELL first year monitoring, second year monitoring, receiving services or not receiving services AND identifies the Number of Months in USA as equal to or less than 36 on the MOSIS April Student Core Submission.

Grade Span Data

From the inception of the MAP through the 2004-2005 school year, the MAP assessments were administered to students for each subject area one time in each grade span (3-5), (6-8), and (9-11). These tests are **grade span assessments**. For MSIP purposes, the Mathematics and Communication Arts 2001-2005 grade span assessment data will be measured throughout fourth cycle for grade spans (3-5) and (6-8) and throughout the fourth year of the fourth cycle for grade span (9-11). These grade span assessments measure student achievement based upon five achievement levels: (Step 1, Progressing, Nearing Proficient, Proficient, and Advanced). The MPI calculation for the grade span assessment data is described on the next page.

Grade Level Data

Beginning with the 2005-2006 school year, the Mathematics and Communication Arts MAP assessments are administered to students each year in grades 3-8. From the 2005-2006 school year to the 2007-2008 school year, Mathematics MAP assessments were administered in grade 10 and Communication Arts assessments were administered in grade 11. These tests are **grade level assessments**. For MSIP purposes, the Mathematics and Communication Arts grade level test data will be measured beginning with the 2005-2006 school year. These grade level assessments measure student achievement based upon four achievement levels: (Below Basic, Basic, Proficient, and Advanced.) The MPI calculation for the grade level assessment data is described on the next page.

Comparing Grade Span Data with Grade Level Data

Districts **should not** try to make comparisons between the grade level test data and prior grade span test data using the MPI or percent proficient. The grade level tests are new tests that were developed with different cut scores for proficiency and with only four achievement levels compared with five.

End-of-Course (EOC) Data

Beginning with the 2008-2009 school year, the Algebra I EOC replaced the Mathematics grade 10 assessment requirement, the English II EOC replaced the Communication Arts grade 11 assessment requirement, and the Biology I EOC replaced the Science grade 11 requirement. These tests are **end-of-course** assessments. For MSIP purposes, these assessments will be measured beginning with the 2008-2009 school year. These end-of-course assessments measure student achievement based upon four achievement levels: (Below Basic, Basic, Proficient, and Advanced.) The MPI calculation for the end-of-course assessment data is described on page 6.

Comparing Grade Level Data with End-of-Course Data

Districts **should not** try to make comparisons between the end-of-course test data and prior grade level test data using the MPI or percent proficient. The end-of-course tests are new tests that were developed with different purpose, were designed for a different population, and different cut scores for proficiency were generated.

Science and Social Studies Data

During the 2002-2003, 2003-2004, 2004-2005, 2005-2006, and 2006-2007 school years, social studies and science assessments were not state-funded. Districts were allowed to choose whether or not to use local funds to administer one or both of these assessments. In 2007-2008 Science assessments became mandatory for grades 5, 8, and 11. In 2008-2009, Biology I replaced the Science 11 assessment. A bonus point for science can be earned in 2009. Please see the section title Subject Area Bonus Points for more information.

MAP PERFORMANCE INDEX (MPI)

For each subject in each grade span, MSIP uses the index approach to compare improvement on the MAP. The index approach is based on a composite of the performance of all students across all MAP achievement levels. The assessment results in each subject tested for each year are converted to index points, and these index points are used to measure improvement from year to year.

MPI CALCULATION

The index is a single composite number that represents the performance of every student in all MAP levels in a tested subject for a defined grade span. Index points are calculated by first multiplying the percent of reportable students scoring in each achievement level for each subject and grade span by the values described below.

MPI Values for Grade Span Data (2001-2005)

Multiply the percent Advanced by 3, percent Proficient by 2.5, percent Nearing Proficient by 2, percent Progressing by 1.5, and percent Step 1 by 1. These products are then summed to produce the MPI which ranges from 100-300. (See the Grade Span MPI Example Calculation on the next page.)

MPI Values for Grade Level Data (2006-2009)

For APR purposes, grade level assessments are measured by defined grade spans (3-5 and 6-8) (for 2006-2008, 9-11). The grade span MPI for the grade level assessments is determined by calculating the percent of students in each achievement level for all grades within a span. For example, the total number of reportable students in each achievement level in grades 3, 4, and 5 is divided by the total number of accountable students in grades 3, 4, and 5 to determine the percent of reportable students in each achievement level. Multiply the percent Advanced by 9, percent Proficient by 8, percent Basic by 7, and percent Below Basic by 6. These products are then summed to produce the MPI which ranges from 600-900. (See the Grade Level MPI Example Calculation on the next page.)

MPI Values for End-of-Course Data (2009)

EOC assessments are measured by defined course content (Algebra I, English II, Biology I). The EOC MPI is determined by calculating the percent of students, regardless of grade level, in each achievement level on each end-of-course assessment plus the percent of students in each achievement level on the high school MAP-A assessment. Multiply the percent Advanced by 9, percent Proficient by 8, percent Basic by 7, and percent Below Basic by 6. These products are then summed to produce the MPI which ranges from 600-900. (See the End-of-Course MPI Example Calculation on the next page.)

MPI Example Calculation - Grade Span Data

The following example shows how the index is calculated in a single subject and grade span:

> STEP 1 – The percent of students in each performance level is determined for each year.

Level	Index Point Value	Year 1	Year 2	Year 3	Year 4	Year 5
Step 1	1.0	19.5%	20.2%	17.0%	16.9%	9.6%
Progressing	1.5	21.3%	20.5%	21.3%	14.0 %	20.0%
Nearing Proficient	2.0	27.0%	27.6%	28.0%	24.6%	25.4%
Proficient	2.5	12.9%	18.4%	18.5%	22.1%	23.0%
Advanced	3.0	19.3%	13.3%	15.2%	22.4%	22.0%

➤ <u>STEP 2</u> – The percentage of students in each performance level is multiplied by the index point value for each year.

Year 1	Year 2	Year 3	Year 4	Year 5
19.5 x 1.0 = 19.50	$20.2 \times 1.0 = 20.20$	$17.0 \times 1.0 = 17.00$	16.9 x 1.0 = 16.90	$9.6 \times 1.0 = 9.60$
21.3 x 1.5 = 31.95	$20.5 \times 1.5 = 30.75$	$21.3 \times 1.5 = 31.95$	$14.0 \times 1.5 = 21.00$	$20.0 \times 1.5 = 30.00$
$27.0 \times 2.0 = 54.00$	$27.6 \times 2.0 = 55.20$	$28.0 \times 2.0 = 56.00$	$24.6 \times 2.0 = 49.20$	$25.4 \times 2.0 = 50.80$
$12.9 \times 2.5 = 32.25$	$18.4 \times 2.5 = 46.00$	$18.5 \times 2.5 = 46.25$	22.1 x 2.5 = 55.25	$23.0 \times 2.5 = 57.50$
19.3 x 3.0 = 57.90	13.3 x 3.0 = 39.90	$15.2 \times 3.0 = 45.60$	22.4 x 3.0 = 67.20	22.0 x 3.0 = 66.00
195.6 Index Points	192.1 Index Points	196.8 Index Points	209.6 Index Points	213.9 Index Points

> <u>STEP 3</u> - For scoring in each grade span, a grid is created and scoring guidelines are applied to the scores in the grid. An example appears in the grid below:

	Year 1	Year 2	Year 3	Year 4	Year 5	Status
Grades 3-5 Math	195.6	192.1	196.8	209.6	213.9	201.6

➤ <u>STEP 4</u> – Status is determined by adding the MPI of year 1, year 2, year 3, year 4, and year 5 and dividing by 5.

MPI Example Calculation - Grade Level Data

The following example shows how the index is calculated in a single subject and grade levels:

> <u>STEP 1</u> – The percent of students in each performance level is determined for each year. The total reportable for an achievement level is divided by the total accountable for the applicable grade level to obtain the percent reportable.

Achievement	Grade 3	Grade 4	Grade 5		Grades 3-5	Grades 3-5	Grades 3-5
Level	Number	Number	Number		Total	Total	Percent
	Reportable	Reportable	Reportable		Reportable	Accountable	Reportable
Below Basic	10	15	20	П	45	130	34.6%
Basic	15	15	10	=	40	130	30.8%
Proficient	5	10	15	=	30	130	23.1%
Advanced	5	5	5	11	15	130	11.5%
		To	tal Accountable		130		

➤ <u>STEP 2</u> – The percentage of students in each performance level is multiplied by the index point value for each year.

Achievement	Index Point Value	Percent	MPI
Level		Reportable	
Below Basic	6	34.6%	$34.6 \times 6 = 207.60$
Basic	7	30.8%	$30.8 \times 7 = 215.60$
Proficient	8	23.1%	23.1 x 8 = 184.80
Advanced	9	11.5%	$11.5 \times 9 = 103.50$
			711.5 Index Points

The sum of each of these products for each subject tested is the index for that subject. The index measures improvement from one year to the next for each subject. The scoring guide defines the required improvement in index score from one year to the next.

> <u>STEP 3</u> - For scoring in each grade level, a grid is created and scoring guidelines are applied to the scores in the grid. An example appears in the grid below:

GRADE LEVEL	Year 1	Year 2	Year 3	Year 4	Year 5	Status
Grades 3-5 Mathematics	711.5	725	735			723.8

> <u>STEP 4</u> – Status is determined by adding the Grade Level MPI of year 1, year 2, year 3, year 4, and year 5 and dividing by the number of years.

MPI Example Calculation – End-of-Course Data

The following example shows how the index is calculated in a single content area for all grade levels:

> <u>STEP 1</u> – The percent of students in each performance level is determined for each year. The total reportable for an achievement level is divided by the total accountable for the applicable content area to obtain the percent reportable.

Achievement	Algebra I	MAP-A		Algebra I	Algebra I	Grades 3-5
Level		Math 10				
	Number	Number		Total	Total	Percent
	Reportable	Reportable		Reportable	Accountable	Reportable
Below Basic	18	0	=	18	100	18.0%
Basic	24	1	=	25	100	25.0%
Proficient	35	2	=	37	100	37.0%
Advanced	19	1	=	20	100	20.0%
	Total Accountable		=	100		

> <u>STEP 2</u> – The percentage of students in each performance level is multiplied by the index point value for each year.

Achievement	Index Point Value	Percent	MPI
Level		Reportable	
Below Basic	6	18.0%	$18.0 \times 6 = 108.00$
Basic	7	25.0%	$25.0 \times 7 = 175.00$
Proficient	8	37.0%	$37.0 \times 8 = 296.00$
Advanced	9	20.0%	$20.0 \times 9 = 180.00$
			759.00 Index Points

The sum of each of these products for each subject tested is the index for that subject. The index measures improvement from one year to the next for each subject. The scoring guide defines the required improvement in index score from one year to the next.

> <u>STEP 3</u> - For scoring in each content, a grid is created and scoring guidelines are applied to the scores in the grid. An example appears in the grid below:

End-of-Course	Year 1	Year 2	Year 3	Year 4	Year 5	Status
Algebra I	759.0					759.0

➤ <u>STEP 4</u> – Status is determined by adding the EOC MPI of years available, year 1, year 2, year 3, year 4, and year 5, and dividing by the number of years. Since only one year of EOC data is available in year four of fourth cycle, year 1 will determine Status for school year 2008-2009.

LEVEL NOT DETERMINED (LND)

This is the percent of students for whom the district is accountable who do not receive a valid MAP score in a subject or content area. Districts may not earn points toward meeting a MAP performance standard when the maximum percent of students in LND is exceeded. The MSIP LND criteria for the 2001-2005 data (grade span test data), the 2006-2009 data (grade level test data) and the 2009 end-of-course data are described below.

LND Criteria 2001-2005 data (grade span test data)

No points are awarded for grade span test data if the average LND in that subject area over the years analyzed exceeds 10%. If the LND in one or more years exceeds 14%, the average LND must be 10% or less **and** the LND in the final year of analysis must be 6% or less in order to earn scoring guide points. If grade span test data is not scored due to the LND percentage, the # symbol appears next to the subject area on the APR summary sheet.

LND Criteria 2006-2009 data (grade level test data)

No points are awarded for grade level test data if the LND is greater than 5% in the final year of analysis or if the average LND is greater than 5%. If grade level test data are not evaluated due to the LND percentage, the # symbol appears next to the subject area on the APR summary sheet.

LND Criteria 2009 data (end-of-course test data)

No points are awarded for end-of-course test data if the LND is greater than 5% in the final year of analysis or if the average LND is greater than 5%. If end-of-course test data are not evaluated due to the LND percentage, the # symbol appears next to the subject area on the APR summary sheet. Districts are required to assess all students in Algebra I, English II, Biology I, and Government. Beginning in school year 2010-2011, districts will receive an LND for each student who graduates without a valid score or evidence of prior accountability fulfillment in each content area.

LND and MAP-A Students

Beginning in 2004-2005, MAP-A students with a scorable MAP-A portfolio in a grade level tested on the MAP are assigned an achievement level.

LND and ELL Students

Scores for ELL students who have been in the United States three years or less are disaggregated if the district codes a student as LEP/ELL first year monitoring, second year monitoring, receiving services or not receiving services AND identifies the Number of Months in USA as equal to or less than 36 on the MOSIS April Student Core Submission.

LND Calculation Example:

Annual LND

- 1. "Accountable Students" minus "Reportable Students" equals "LND Students"
- 2. "LND Students" divided by "Accountable Students" equals "Annual Percent of Students in LND"

Average LND

1. Sum of Annual Percent of Students in LND for all required years divided by the number of required years

	Year 1	Year 2	Year 3	Year 4	Year 5	Average LND
Accountable	50	45	52	60	50	
Reportable	45	40	49	58	49	
LND Students	5	5	3	2	1	
Percent of Students in LND	10.0%	11.1%	5.8%	3.3%	2.0%	6.4%

GAP BONUS POINTS

Districts have the opportunity to earn bonus credit toward meeting each MAP standard, using either a comparison of the MAP improvement of their minority population or their free and reduced-price lunch population with the state majority. If either of the following conditions is considered "Met", the district may meet the MAP standard IF the district has earned at least 40 Status + Progress points. GAP BONUS credit CANNOT be calculated for the end-of-course MAP standards in the 2008-2009 school year.

Minority Comparison

The MAP scores of minority groups that include 20 or more students are aggregated to create an MPI for the minority population. The MAP improvement of the district's minority population from 2008 to 2009 is compared with that of the improvement of the state majority from 2008 to 2009. The bonus provision is considered "Met" if the improvement of the district's minority population is greater than the improvement of the state majority. The Gap Bonus "Met" alone does not mean the MAP standard is "Met". In addition, the district still must earn at least 40 Status + Progress points in order to meet the MAP standard.

Minority Calculation:

The district's data are examined to determine the minority groups (Hispanic, Black (not Hispanic), Asian/Pacific Islander, American Indian/Alaskan Native) in which 20 or more students were assessed in each grade span in 2008 and 2009. The data for those groups are aggregated to create a single MPI for comparison purposes. (See the MPI Grade Level Calculation, Steps 1-3 above to determine how to calculate the MPI.) The minority MPI for 2008 is compared with the minority MPI for 2009 to determine improvement. An MPI is calculated for the state majority group for 2008 and 2009 for comparison purposes. The 2008 MPI for the state majority is compared with the 2009 MPI for the state majority to determine improvement. If the district's minority population improved more than the state majority, the district meets the Gap Bonus provision.

Free and Reduced-Price Lunch Comparison

If the district's free and reduced-price lunch population includes 20 or more students, the MPI improvement of those students from 2008 to 2009 is compared with the improvement of the state non-free and reduced-price lunch population. The bonus provision is considered "Met" if the improvement of the district's free and reduced-price lunch population is greater than the improvement of the state non-free and reduced-price lunch population. The Gap Bonus "Met" alone does not mean the MAP standard is "Met". In addition, the district still must earn at least 40 Status + Progress points in order to meet the MAP standard.

Free and Reduced-Price Lunch Calculation:

The district's data are examined to determine if 20 or more free and reduced-price lunch students were assessed in each grade span in 2008 and 2009. The data for those groups are aggregated to create a single MPI for comparison purposes. (See the MPI Grade Level Calculation, Steps 1-3 above to determine how to calculate the MPI.) The free and reduced-price lunch MPI for 2008 is compared with the free and reduced-price lunch MPI for 2009 to determine improvement. An MPI is calculated for the state non-free and reduced-price lunch group for 2008 and 2009 for comparison purposes. The 2008 MPI for the state non-free and reduced-price lunch group is compared with the 2009 MPI for the state non-free and reduced-price lunch group to determine improvement. If the district's free and reduced-price lunch population improved more than the state non-free and reduced-price lunch group, the district meets the Gap Bonus provision.

EXAMPLE:

Missouri Assessment Program	2007	2008	Improvement
GAP BONUS			
9.1*1 Grades 3-5 Mathematics			
District Minority	717.0	720.0	3.0
State Majority	756.0	760	4.0
District Free- & Reduced-Price Lunch	720.0	735.0	15.0
State Non-Free- & Reduced-Price Lunch	764.2	768.4	4.2

In this example, the district's minority population did not improve as much as the state majority, so no Gap Bonus credit was awarded for the minority population. The district's free and reduced-price lunch population improved more than the state's non-free and reduced-price lunch population so Gap Bonus credit was awarded.

BONUS ACHIEVEMENT STANDARD

- Districts have the opportunity to meet an additional performance standard if any improvement is demonstrated in the MPI from 2008 to 2009 in a majority of the MAP standards (9.1*1-9.1*4).
- Due to a change in the assessment, improvement CANNOT be calculated for MAP standards 9.1*5 and 9.1*6 during the fourth year of 4th Cycle. For 2009, credit will be given for improvement in Standard 9.1*5 if the district attains High 1 or High 2 status on the Algebra I assessment and in Standard 9.1*6 if the district attains High 1 or High 2 status on the English II assessment.
- To meet the Bonus Achievement Standard, school districts must demonstrate improvement in the MPI from 2008 to 2009 in three out of four standards 9.1*1-9.1*4 or four out of six standards 9.1*1-9.1*6.

EXAMPLE:

Missouri Assessment Program GRADE LEVEL	2008	2009	Improvement
9.1*1 Grades 3-5 Mathematics	730.0	731.0	Yes
9.1*2 Grades 3-5 Communication Arts	707.3	704.6	No
9.1*3 Grades 6-8 Mathematics	786.0	786.1	Yes
9.1*4 Grades 6-8 Communication Arts	775.0	785.0	Yes
9.1*5 Algebra I	*	*	
9.1*6 English II	*	*	

Missouri Assessment Program BONUS GRADE LEVEL ACHIEVEMENT	2008	2009
Number of MAP Standards Evaluated	4	4
Number Demonstrating Improvement		3
Percent of MAP Standards Improved		75%

^{**}Bonus Achievement Standard is Met at 75%.

EXAMPLE:

Missouri Assessment Program GRADE LEVEL	2008	2009	Improvement
9.1*1 Grades 3-5 Mathematics	730.0	731.0	Yes
9.1*2 Grades 3-5 Communication Arts	707.3	704.6	No
9.1*3 Grades 6-8 Mathematics	786.0	786.1	Yes

Standard 9.3 ACT Calculation

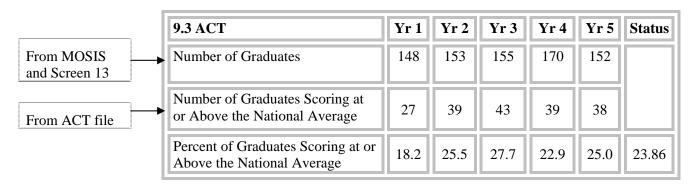

Sources of data used in calculation:

- June Cycle of Core Data, Screen 13 (2005-2009)
 - Includes aggregated student-level data from MOSIS June Cycle certified files
- ACT File

NOTES:

- Only scale score data as reported by ACT will be used in these calculations.
- When students take the ACT multiple times, the highest test score is used to determine the number of graduates scoring at or above the national average.

Example of supporting data format for APR:

Method for calculating supporting data:

The percent of graduates scoring at or above the national average is determined by dividing the number of graduates scoring at or above the national average by the number of graduates, then multiplying by 100.

EXPLANATION OF DATA	EXAMPLES OF DATA	EXAMPLES OF
	(using Yr 1-Yr 5 figures)	CALCULATIONS
1) The number of graduates is reported on	number of graduates = 148	
Screen 13.		
2) The number of graduates scoring at or	number of graduates	
above the national average is provided by	scoring at or above the	
ACT.	national average = 27	
3) The percent of graduates scoring at or	a) number of graduates =	% of graduates scoring at or
above the national average is determined by	148	above the national average =
dividing the number of graduates scoring at	b) number of graduates	
or above the national average by the	scoring at or above the	$27 \div 148 = .182$
number of graduates, then multiplying by	national average = 27	
100.		$.182 \times 100 = 18.2\%$
4) Status is determined by adding Yr1, Yr2,	a) Yr1 + Yr2 + Yr3 + Yr4 +	18.2 + 25.5 + 27.7 + 22.9 +
Yr3, Yr4, and Yr5 of the percent of	Yr 5 = 119.30	25.0 = 119.30
graduates scoring at or above the national		
average and dividing by 5.		$119.30 \div 5 = 23.86\%$

For more information on the ACT or to obtain the national average, visit the ACT website at www.act.org.

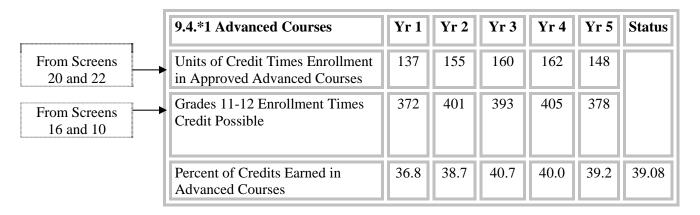

Standard 9.4 Advanced Courses Calculation (9.4.1)

Sources of data used in calculation:

- October Cycle of Core Data, Screens 16, 20, and 22
- August Cycle of Core Data, Screen 10

NOTE: In addition to the advanced courses provided within the resident district, advanced courses provided off site are automatically included in the calculation for 9.4.1 if the required data (including course numbers) are submitted to populate Core Data Screen 22. Screen 22 data must be reported for each area institution that provides advanced courses (i.e., other districts, community colleges, four-year colleges and universities, and Internet/electronic instructional providers). Only those specific courses with course codes and grade levels matching those on the approved advanced course list, courses coded with a delivery system of IB or AP, and dual credit courses (excluding career education dual-credit classes) count in the advanced course calculation.

Example of supporting data format for APR:

Method for calculating supporting data:

The percent of credits earned in advanced courses is determined by dividing the units of credit times enrollment in approved advanced courses by grades 11-12 enrollment times credit possible, then multiplying by 100. The following explains the step-by-step process and provides an example of how the calculations are performed.

EXPLANATION OF CALCULATIONS	EXAM	EXAMPLES OF DATA		EXAMPLES OF
	(using Y	ear 1 figu	ires from	CALCULATIONS
		above)		
1) Units of credit times enrollment in	ADVANC	ED		
approved advanced courses is determined	Course #	Credit	Enroll	Adv. Course Units Earned
by using the courses reported on Screen 20	054810	1	18	1 X 18 = 18
that match the advanced course criteria (i.e.	056500	1	16	1 X 16 = 16
course number, sequence, and grade level	062000	.5	20	$.5 \times 20 = 10$
see below for a list of advanced courses) and	066300	1	17	1 X 17 = 17
non-career education dual-credit courses	115860	1	19	1 X 19 = 19
reported on Screen 22. The credit value of	991105	2	21	$+ 2 \times 21 = 42$
each course is multiplied by the course				122
enrollment; then these products are summed.				

	DUAL CREDIT (excluding career education) Course # Credit Enroll 115861 1 15	Dual Credit Units Earned 1 X 15 = 15 122 + 15 = 137 Total Units Earned
2) Grades 11-12 enrollment times credits possible is determined by using the sum of	September enrollment for grades 11 and 12 = 62	
the enrollment in grades 11 and 12 (using		
September count), which is reported on Screen 16. This total enrollment number is multiplied by the total number of periods per	Periods per day = 6	62 X 6 = 372
day, as reported on Screen 10. If the reported		
periods per day are less than 6, this indicates		
block scheduling. In this case, the enrollment		
is multiplied by total periods per day times 2. 3) The percent of credits earned in	a) units of credit times	% of credits earned in
advanced courses is determined by dividing	enrollment in advanced	advanced courses =
units of credit times enrollment in	courses = 137	advanced courses =
advanced courses by grades 11-12	b) grades 11-12 enrollment	$137 \div 372 = .368$
enrollment times credits possible, then	times credits possible = 372	
multiplying by 100.		$.368 \times 100 = 36.8\%$
4) Status is determined by adding Yr1, Yr2,	a) Yr1 + Yr2 + Yr3 + Yr4 +	36.8 + 38.7 + 40.7 + 40.0 =
Yr3, Yr4, and Yr5 of the percent of credits	Yr 5 = 195.40	195.40
earned in advanced courses and dividing by		
5.		$195.40 \div 5 = 39.08\%$

List of Advanced Courses

The following courses/course codes have been designated "Advanced Courses." These courses are considered advanced because they are over and above the courses required for graduation. It is assumed that the content of the courses, in general, is at a level suitable for juniors and seniors who are preparing for postsecondary education or training.

Course Code	Course Name	Description
054800	Language Arts	Grade 11 or 12 and sequence 3 or greater
054804-5	Comp/Creative Writing	Grade 11 or 12
054806	Applied Comm.	Grade 11 or 12 and sequence 3 or greater
054810	Journalism	Grade 11 or 12 and sequence 2 or greater
054817	Folklore	Grade 11 or 12
054819-28	Literature, Various	Grade 11 or 12
054845	Shakespeare	Grade 11 or 12
054850	Mythology	Grade 11 or 12
054860	Word Study (Semantics)	Grade 11 or 12
054861	C. Prep English	Grade 11 or 12
054863	Satire-Humor	Grade 11 or 12
054864	Ethnic Literature	Grade 11 or 12
056500	Speech	Grade 11 or 12 and sequence 2 or greater
056510	Debate	Grade 11 or 12
062000	American Sign Language	Grade 11 or 12
064900	French	sequence 2 or greater

065100	German	sequence 2 or greater
065700	Latin	sequence 2 or greater
066200	Russian	sequence 2 or greater
066300	Spanish	sequence 2 or greater
067100	Hebrew	sequence 2 or greater

Career Education Courses Calculation (9.4.2)

Sources of data used in calculation:

- October Cycle of Core Data, Screens 16, 20, and 22
- August Cycle of Core Data, Screen 10
- State-Approved Career Education Course List

NOTE: Career education courses reported on Screens 20 and 22 are compared with a list of the district's state approved career education courses. Only those career education courses verified by the Division of Career Education as state approved are counted for MSIP purposes. Dual-credit career education classes are included in this standard.

Example of supporting data format for APR:

Method for calculating supporting data:

The percent of credits earned in career education courses is determined by dividing the units of credit times enrollment in approved career education courses by grades 11-12 enrollment times credit possible, then multiplying by 100. The following explains the step-by-step process and provides an example of how the calculations are performed.

EVDLANATION OF CALCULATIONS	TITAL	ADI EC 6		EXAMPLES OF
EXPLANATION OF CALCULATIONS	EXAMPLES OF DATA			EXAMPLES OF
	(using Year 1 figures from above)			CALCULATIONS
1) The units of credit times enrollment in	CAREER ED. (on-site)			
approved career education courses is	Course #	Credit	Enroll	Car. Ed. Units Earned On-
determined by using data reported on	034354	1.5	17	<u>site</u>
Screen 20 to identify state-approved career	034380	1	13	$1.5 \times 17 = 25.5$
education courses, indicated by a program	040080	2	18	1 X 13 = 13
code "01" (see next page for exceptions).				$+2 \times 18 = 36$
Data from Screen 22 are used to identify				74.5
career education courses offered off-site	CAREER ED. (off-site)			
(i.e., at an area career education school or	Course #	Credit	<u>Enroll</u>	
college). The credit value of each course is	016720	1	15	Car. Ed. Units Earned Off-
multiplied by the course enrollment, then				<u>site</u>
the products are summed.				1 X 15 = 15
				74.5 + 15 = 89.5 Total Units
				Earned
2) Grades 11-12 enrollment times credits	September enrollment for grades			
possible is determined by using the sum of	11 and 12 = 62			62 X 6 = 372
the enrollment in grades 11 and 12 (using				

Missouri Department of Elementary & Secondary Education Understanding Your APR

2009 4th Cycle APR
DESE 3341-19 9/03

September count), which is reported on	Periods per day $= 6$	
Screen 16. This total is multiplied by the		
total number of periods per day, as reported		
on Screen 10. If the reported periods per		
day are less than 6, this indicates block		
scheduling. In this case, the enrollment is		
multiplied by total periods per day times 2.		
3) To determine percent of credits earned	a) units of credit times enrollment	% of credits earned in
in career education courses, the units of	in career education courses = 89.5	career education courses =
credit times enrollment in career	b) grades 11-12 enrollment times	$89.5 \div 372 = .241$
education courses are divided by grades	credits possible = 372	
11-12 enrollment times credits possible,		$.241 \times 100 = 24.1\%$
then multiplied by 100. *		
4) Status is determined by adding Yr1, Yr2,	a) $Yr1 + Yr2 + Yr3 + Yr4 + Yr5$	24.1 + 25.4 + 23.9 + 27.7 +
Yr3, Yr4, and Yr5 of the percent of credits	= 125.6	24.5 = 125.6
earned in career education courses and		
dividing by 5.		$125.6 \div 5 = 25.12\%$

^{*}Career education comprehensive high schools include 9-12 enrollment.

Career Education Courses Exceptions

All state-approved career education courses are used in the evaluation of MSIP Performance Standard 9.4.2 **except for the following:**

Course Code	Course Name
016700	Exploring Agriculture
016710	Agricultural Science 1
016760	Agricultural Science 2
096800	Exploratory Family and Consumer Sciences

Note: Please contact the Division of Career Education (573/751-3872) if you have questions regarding the approval of a career education program.

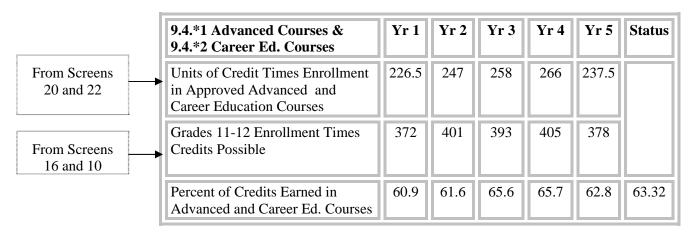

Advanced and Career Education Courses Calculation (9.4.1 and 9.4.2)

Note: This calculation is used to determine if a district meets 9.4.1 and 9.4.2 using the "combined" method.

Sources of data used in calculation:

- October Cycle of Core Data, Screens 16, 20, and 22
- August Cycle of Core Data, Screen 10
- State-Approved Career Education Course List

Example of supporting data format for APR:

Method for calculating supporting data:

The percent of credits earned in advanced and career education courses combined is determined by dividing the units of credit times enrollment in approved advanced and career education courses by grades 11-12 enrollment times credit possible, then multiplying by 100. The following explains the step-by-step process and provides an example of how the calculations are performed.

now the carculations are performed.		
EXPLANATION OF CALCULATIONS	EXAMPLES OF DATA	EXAMPLES OF
	(using Yr 1 figures from above)	CALCULATIONS
1) Units of credit times enrollment in approved	a) Units of credit times	137 + 89.5 = 226.5
advanced and career education courses is calculated	enrollment in approved	
by adding the units of credit times enrollment in	advanced courses = 137	
approved advanced courses to the units of credit times	b) Units of credit times	
enrollment in approved career education courses. (For	enrollment in approved career	
further explanation, see Subsections D1 and D2.)	education courses = 89.5	
2) Grades 11-12 enrollment times credits possible is	September enrollment for	62 X 6 = 372
determined by using the sum of the enrollment in	grades 11 and $12 = 62$	
grades 11 and 12 (using September count), which is		
reported on Screen 16. This total enrollment number is	Periods per day $= 6$	
multiplied by the total number of periods per day, as		
reported on Screen 10. If the reported periods per day		
are less than 6, this indicates block scheduling. In this		
case, the enrollment is multiplied by total periods per		
day times 2.		

3) The percent of credits earned in advanced and	a) units of credit times	% of credits earned in
career education courses is determined by dividing	enrollment in advanced courses	advanced courses =
units of credit times enrollment in approved	= 226.5	
advanced and career education courses by grades	b) grades 11-12 enrollment	$226.5 \div 372 = .609$
11-12 enrollment times credits possible, then	times credits possible = 372	
multiplying by 100.	_	.609 X 100 = 60.9%
4) Status is determined by adding Yr1, Yr2, Yr3, Yr4,	a) Yr1 + Yr2 + Yr3 + Yr4 +	60.9 + 61.6 + 65.6 +
and Yr5 of the percent of credits earned in advanced	Yr 5 = 316.60	65.7 + 62.8 = 316.60
and career education courses and dividing by 5.		
		$316.60 \div 5 = 63.32\%$

College Placement Calculation (9.4.3)

Sources of data used in calculation:

- February Cycle of Core Data, Screen 8
- June Cycle of Core Data, Screen 13

Example of supporting data format for APR:

	9.4.*3 College Placement	Yr 1	Yr 2	Yr 3	Yr 4	Yr 5	Status
From Screen 8	Number of Graduates Entering College	69	72	79	83	93	
From Screen 13 (previous year)	Number of Graduates	126	133	128	141	143	
	Percent of Graduates Entering College	54.8	54.1	61.7	58.9	65.0	58.90

Method for calculating supporting data:

The percent of graduates entering college is determined by dividing the <u>number of graduates entering college</u> by the <u>number of graduates</u>, then multiplying by 100.

EXPLANATION OF CALCULATIONS	EVAMDI EC OE	DATA	EXAMPLES OF
EAFLANATION OF CALCULATIONS	EXAMPLES OF DATA		
	(using Year 1 figures from		CALCULATIONS
	above)		
1) The number of graduates entering		Totals	
college is determined by using the sum of the previous year's graduates who entered 4-year	1 4-Vear college 1 4 3		10 15 10 50
college, 2-year college, or non-college credit	2-year college	16	43+16+10 = 69

REL, CED REL, CED N-R, MIL		TOTAL = 17 + 16 = 33
REL, MIL N-R.		

3) The percent of career education completers who are placed is	a) number of graduates completing a career education program = 41	percent of career education completers
determined by dividing the number	b) number of graduates completing a	who are placed =
of graduates completing a career	career education program placed in	
education program placed in	occupations relating to their training,	$33 \div 41 = .805$
occupations relating to their	attending college, or in the military =33	
training, attending college, or in		
the military by the number of		.805 X 100 = 80.5%
graduates completing a career		
education program, then		
multiplying by 100.		
4) Status is determined by adding	a) Yr1 + Yr2 + Yr3+ Yr4	80.5 + 66.7 + 71.1 +
Yr1, Yr2, Yr3, Yr4, and Yr5 of the	+ Yr 5 = 369.50	76.2 + 75.0 = 369.50
percent of career education		
completers who are placed and		$369.50 \div 5 = 73.90\%$
dividing by 5.		

Career Education Placement/Follow-Up Guidelines

Follow-up data is reported on the previous year's graduates based on the status of the graduates 180 days following their exit from career education training. *Each graduate should be reported in only one career education program area.* Districts should collect follow-up information on any student who graduated high school and received credit in at least one state-approved career education course (excluding Exploring Agriculture, Industrial Technology, and any FACS course) during grades 9-12. However, if students completed state-approved career courses at the comprehensive high school and the area career education school, their follow-up data should <u>not</u> be reported for both locations. Generally, the area career education school is responsible for completing the follow-up data on screen 27 and providing the sending school with a copy.

If the graduate is employed and continuing education, use the following guidelines:

- A graduate attending school (full- or part-time) <u>and</u> employed (full or part-time) in a field for which they were trained, should be reported as "employed related" (EMP REL).
- A graduate attending school (full- or part-time) in a field for which they were trained, but not employed in a field for which they were trained should be reported as "continuing education related" (CED REL).
- A graduate attending school (full- or part-time) in a field for which they were <u>not</u> trained, but employed (full or part-time) in a field for which they were trained should be reported as "employed related" (EMP REL).

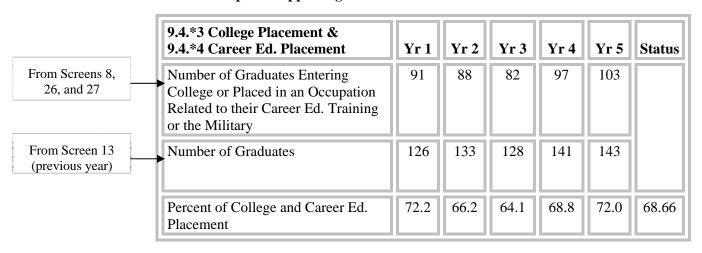

College and Career Education Placement Calculation (9.4.3 and 9.4.4 Combined)

Note: This calculation is used to determine if a district meets 9.4.3 and 9.4.4 using the "combined" method.

Sources of data used in calculation:

- February Cycle of Core Data, Screens 8, 26, and 27
- June Cycle of Core Data, Screen 13

Example of supporting data format for APR:

Method for calculating supporting data:

The percent of graduates entering college or in career education placement is determined by dividing the <u>number of graduates entering college or placed in an occupation related to their career education training or the military by the number of graduates, then multiplying by 100.</u>

by the <u>number of graduates</u> , then multiplying b	y 100.

Data.		

3) The percent of college and career	a) number of graduates entering	% of graduates entering
education placement is determined by	college or placed in an occupation	college =
dividing the number of graduates entering	related to their career education	
college or placed in an occupation related	training or the military = 91	$91 \div 126 = .722$
to their career education training or the	b) number of graduates = 126	
military by the number of graduates, then		$.722 \times 100 = 72.2\%$
multiplying by 100.		
4) Status is determined by adding Yr1, Yr2,	a) Yr1 + Yr2 + Yr3+ Yr4	72.2 + 66.2 + 64.1 +
Yr3, Yr4, and Yr5 of the percent of college	+ Yr 5 = 343.30	68.8 + 72.0 = 343.30
and career education placement and		
dividing by 5.		$343.30 \div 5 = 68.66\%$

Standard 9.5 Graduation Rate Calculation (9.5)

Sources of data used in calculation:

- June Cycle of Core Data, Screen 13 (2005-2009)
 - Includes aggregated student-level data from MOSIS June Cycle certified files

NOTES:

- Dropouts reported as the result of an expulsion due to a violent act according to Section 160.261 and 167.171, RSMo. will be excluded from the total number of dropouts used for MSIP purposes. The number of 9-12 grade students reported as expelled on Screen 9 of Core Data will be subtracted from the total number of 9-12 dropouts reported on Screen 13 of Core Data.
- In the year a district is being considered for classification under the Missouri School Improvement Program, the district *may* not meet the Graduation Rate Standard (9.5) if the district has not consistently reported students who drop out of school to the Missouri Literacy Hotline, as required by Standard 8.7.3.
- In the year a district is being considered for classification under the Missouri School Improvement Program, the district may appeal to earn credit for dropouts who completed their GED within 5 years of dropping out of school (see explanation and example on next page). Districts may also appeal to disaggregate those students who are included in the dropout count more than one time.

Example of supporting data format for APR:

	9.5 Graduation Rate	Yr 1	Yr 2	Yr 3	Yr 4	Yr 5	Status
From MOSIS and Screen 13	Number of Graduates	126	133	128	141	143	
From MOSIS and Screen 13	Number of 9-12 Cohort Dropouts + Graduates	135	142	135	147	149	
	Graduation Rate	93.3	93.7	94.8	95.9	96.0	94.74

Method for calculating supporting data:

The persistence to a graduation rate is determined by dividing the <u>number of graduates</u> by the <u>number</u>

EXPLANATION OF	EXAMPLES OF DATA	EXAMPLES OF
CALCULATIONS	(using Year 1 figures from above)	CALCULATIONS
1) The number of graduates is	number of graduates = 126	
reported on Screen 13.		
2) The number of 9-12 cohort	number of graduates = 126	
dropouts + graduates is determined		
by adding the number of graduates	Cohort dropouts:	126 + 9 = 135
reported on Screen 13 and the number	Grade $12-2005 = 2$	
of cohort dropouts reported on Screen	Grade $11-2004 = 2$	
13.	Grade $10-2003 = 2$	
	Grade $09-2002 = 3$	
	Total Cohort dropouts: 9	

Missouri Department of Elementary & Secondary Education Understanding Your APR

2009 4th Cycle APR DESE 3341-19 9/03

3) The persistence to graduation rate	a) number of graduates = 126	
is determined by dividing the number	b) number of 9-12 cohort dropouts +	$126 \div 135 = .933$
of graduates by the number of 9-12	graduates = 135	
cohort dropouts + graduates		$.933 \times 100 = 93.3\%$
4) Status is determined by adding Yr1,	a) Yr1 + Yr2 + Yr3+ Yr4	93.3 + 93.7 + 94.8 +
Yr2, Yr3, Yr4, and Yr5 of the	+ Yr 5 = 473.70	95.9 + 96.0 = 473.70
persistence to graduation rate and		
dividing by 5.		$473.70 \div 5 = 94.74\%$

GED Bonus Points Calculation

In the year a district's classification is being considered under the Missouri School Improvement Program, the district may earn one progress bonus point if in at least three of the past five years at least 5% of the district's five-year average number of seniors earned a GED within 5 years of dropping out of school. The following step-by-step example illustrates the GED bonus point calculation. The number of dropouts reported on Core Data is compared with the number of dropouts reported by the district to the Adult Literacy Hotline. Districts must have consistently reported their dropouts to the Adult Literacy Hotline in order for this bonus provision to be considered.

Example:

# of seniors (as reported in the September count on	Yr 1	Yr 2	Yr 3	Yr 4	Yr 5
Core Data screen 16)	38	46	42	46	39
# of GED completers (only those who complete the					
GED within five years of their drop-out date are	0	2	3	2	1
counted in the bonus points calculation)					

STEP 1 – Average the number of seniors from the past five years.

$$\frac{38+46+42+46+39}{5} = 42$$

> <u>STEP 2</u> – Multiply the five-year average by .05 (rounding to the nearest whole number). This product is 5% of the average number of seniors.

$$.05 \times 42 = 2$$

➤ <u>STEP 3</u> – Compare the product of the calculation in step 2 with the annual number of dropouts who completed a GED within five years of their drop-out date. The district earns one progress bonus point if in at least three out of five years the number of GED completers equals or exceeds 5% of the average number of seniors.

In this example, 5% of the average number of seniors is two. The district earns one progress bonus point because the number of GED completers equals or exceeds two in Years 2, 3, and 4.

Standard 9.6 Attendance Calculation

Sources of data used in calculation:

- June Cycle of Core Data, Screens 10 and 14 (2005-2009)
 - Includes aggregated student-level data from MOSIS June Cycle certified files
- February Cycle of Core Data, Screen 16

Example of supporting data format for APR:

9.6 Average Daily Attendance	Yr 1	Yr 2	Yr 3	Yr 4	Yr 5	Status
Grades K-8	94.3	94.2	94.3	94.4	94.6	
Grades 9-12	90.8	91.8	90.5	91.1	92.4	
Grades K-12	93.1	93.5	93.1	93.4	93.9	93.40

Method for calculating supporting data:

The average daily attendance for each grade span is determined by using the "hours of absence" method. This method is calculated by dividing the <u>hours of attendance</u> by the <u>hours possible</u>, then multiplying by 100.

	HOURS OF ABSENCE METHOD	
EXPLANATION OF	EXAMPLES OF DATA	EXAMPLES OF
CALCULATIONS	(using Year 1 figures from above)	CALCULATIONS
1) The hours of attendance is	ATTENDANCE HOURS	163,298+40,113+0+0 = 203,411
determined by adding the Full-	Full-time: 163,298	
time, Part-time, Deseg In, and	Part-time: 40,113	
Fed Lands attendance hours	Deseg in: 0	
reported on Screen 14.	Fed lands: 0	
2) The hours possible is		a) hours of absence =
determined by adding attendance	Resident I hours of absence = 15,061	15,061+0+0 = 15,061
hours and hours of absence.	Deseg In hours of absence = 0	b) attendance hours = 203,411
Hours of absence are reported on	Fed Lands hours of absence = 0	c) hours possible =
Screen 14 and include the totals		15,061+203,411 = 218,472
for Resident I, Deseg In, and Fed		
Lands.		
3) The attendance rate using	a) hours of attendance = 203,411	Average daily attendance using
the "hours of absence" method	b) hours possible = 218,472	the hours of absence method =
is determined by dividing the		
hours of attendance by the		$203,411 \div 218,472 = .931$
hours possible, then multiplying		
by 100.		.931 X 100 = 93.1%
4) Status is determined by	a) total of Yr1 + Yr2 + Yr3+ Yr4	93.1 + 93.5 + 93.1 + 93.4
adding Yr1, Yr2, Yr3, Yr4, and	+ Yr 5 = 467.0	+ 93.9 = 467.0
Yr5 of the grades K-12 average		
daily attendance and dividing		$467.0 \div 5 = 93.40\%$
by 5.		

Example of supporting data format for APR:

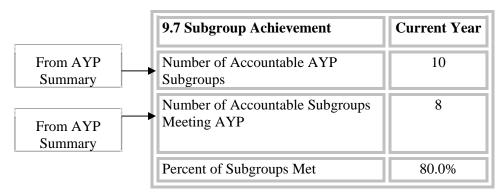

9.6 Average Daily Attendance	Yr 1	Yr 2	Yr 3	Yr 4	Yr 5	Status
Grades K-8	94.3	94.2	94.3	94.4	94.6	
Grades 9-12	90.8	91.8	90.5	91.1	92.4	
Grades K-12	93.1	93.5	93.1	93.4	93.9	93.40

Standard 9.7 Subgroup Achievement Calculation

Sources of data used in calculation:

• Adequate Yearly Progress (AYP) Reports

Example of supporting data format for APR:

Method for calculating supporting data:

The percent of subgroups meeting AYP is determined by dividing the <u>Number of Accountable Subgroups</u> <u>Meeting AYP</u> by the <u>Number of Accountable AYP Subgroups</u>, then multiplying by 100.

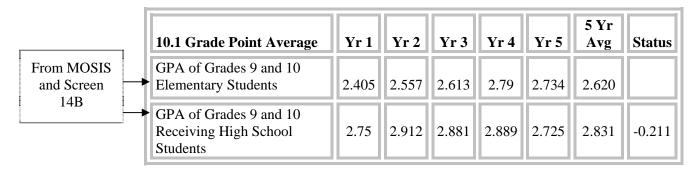

EXPLANATION OF	EXAMPLES OF DATA	EXAMPLES OF
CALCULATIONS	(using Year 1 figures from above)	CALCULATIONS
1) Number of accountable AYP	number of accountable AYP	
subgroups is reported on the District-	subgroups=10	
Level AYP Summary Report as		
"Overall Subgroups (Both Math and		
Communication Arts) Total Groups"		
2) Number of accountable subgroups	number of accountable subgroups	
meeting AYP is reported on the	meeting AYP=8	
District-Level AYP Summary Report		
as "Overall Subgroups (Both Math and		
Communication Arts) Groups Met"		
3) The percent of subgroups met is	a) number of accountable subgroups	
determined by dividing the number of	meeting AYP=8	$8 \div 10 = .80$
accountable subgroups meeting AYP	b) number of accountable AYP	
by the number of accountable AYP	subgroups=10	$.80 \times 100 = 80.0\%$
subgroups		

Standard 10.1 Post-Elementary School GPA Calculation (K-8 Districts Only)

Sources of data used in calculation:

- June Cycle of Core Data, Screen 14B (2005-2009)
 - Includes aggregated student-level data from MOSIS June Cycle certified files

Example of supporting data format for APR:

Method for calculating supporting data:

The <u>GPA of grades 9 and 10 elementary students</u> is determined by finding the average GPA (using a 4-point scale) of resident II (tuition) students who graduated from a K-8 district and are in either grade 9 or 10 at the receiving school.

The <u>GPA of grades 9 and 10 receiving high school students</u> is determined by finding the average GPA (using a 4-point scale) for students in grades 9 and 10 who are not resident II students.

EXPLANATION OF CALCULATIONS	EXAMPLES OF DATA (using Year 1 figures from				_	EXAMPLES OF ALCULATIONS	
1) The GPA of grades 9 and 10 elementary		raduates	11-pt	Calculation	4-pt		
students is calculated using the GPA (rounded		ADE 9	7.34	$(7.34+1) \div 3$			
to the nearest thousandth) reported on Screen	District G	PA Students	4.513	$(4.513+1) \div 3$	1.838		
14B for ninth- and tenth-grade resident II	Dist.#1 7.	.34 5	6.428	$(6.428+1) \div 3$	2.476		
students who graduated from a K-8 district. If	Dist.#2 4.	.513 2	4.895	$(4.895+1) \div 3$	1.965		
GPAs are reported on an 11-point scale, they	CD A	DE 10		ted GPA			
must be converted to a 4-point scale before performing the calculations. The formula for		DE 10		X 5 = 13.9			
this conversion is $(GPA + 1) \div 3$. To		PA Students 428 2	1.838	$8 \times 2 = 3.676$			
determine the overall average of the K-8		895 2	$2.476 \times 2 = 4.952$				
graduate GPAs, first the GPA for grade 9 is	2150.112	.0,0	1.965 X 2 = 3.93				
multiplied by the number of students in grade			To	tal = 26.458			
9. Next, the GPA for grade 10 is multiplied			Total #	K-8 graduates			
by the number of students in grade 10. These				5+2+2+2 = 11			
steps are repeated for all districts attended by			Final C	alculated GPA			
the K-8 graduates. The products are then summed and divided by the total number of K-8 graduates in grades 9 and 10.			26	$.458 \div 11 = 2.40$)5		

2) The GPA of grades 9 and 10 elementary	Receiving District Students	11-pt Calculation 4-pt	
students is calculated using the GPA (rounded	GRADE 9	7.574 $(7.574+1) \div 3$ 2.858	
to the nearest thousandth) reported on Screen	District GPA Students	$6.158 (6.158+1) \div 3 2.386$	
14B for ninth- and tenth-grade receiving-	Dist.#1 7.574 615	(0.12011) 1 2	
district students (GPAs reported on an 11-	Dist.#2 6.158 263	7.667 $(7.667+1) \div 3$ 2.889	
point scale are converted to a 4-point scale).		6.475 $(6.475+1) \div 3$ 2.492	
To determine the overall average of the	GRADE 10	Calculated GPA	
receiving-district student GPAs, first the GPA	District GPA Students	2.858 X 615 = 1757.67	
for grade 9 is multiplied by the number of	Dist.#1 7.667 589	$2.386 \times 263 = 627.518$	
students in grade 9. Next, the GPA for grade	Dist.#2 6.475 206	$2.889 \times 589 = 1701.621$	
10 is multiplied by the number of students in		$2.492 \times 206 = 513.352$	
grade 10. These steps are repeated for all		Total = 4600.161	
receiving districts. The products are then		Total # Receiving Dist. Students	
summed and divided by the total number of		615+263+589+206 = 1673	
receiving-district students in grades 9 and 10.		Final Calculated GPA	
		4600.161 ÷ 1673 = 2.75	
3) The 5 Yr Avg of the GPA of grades 9 and	a) 5 Yr Avg of the GPA of	GPA of grades 9 and 10	
10 elementary students is determined by	grades 9 and 10 elementary	elementary students:	
adding Yr1, Yr2, Yr3, Yr4, and Yr5 and	students Yr1 + Yr2 + Yr3+	2.405 + 2.557 + 2.613 + 2.79 +	
dividing by 5. The 5 Yr Avg of the GPA of	Yr4 + Yr5 = 13.099	2.734 = 13.099	
Grades 9 and 10 Receiving High School	b) 5 Yr Avg of the GPA of	$13.099 \div 5 = $ 2.620	
Students is determined by adding Yr1, Yr2,	Grades 9 and 10 Receiving	GPA of grades 9 and 10	
Yr3, Yr4, and Yr5 and dividing by 5.	High School Students Yr1 +	receiving high school students:	
	Yr2 + Yr3 + Yr4 + Yr5 =	2.75 + 2.912 + 2.881 + 2.889 +	
	14.157	2.725 = 14.157	
		$14.157 \div 5 = 2.831$	
4) Status is determined by subtracting the 5	a) GPA of grades 9 and 10		
year average of the GPA of Grades 9 and 10	elementary students = 2.620	Elem. Rec HS	
Receiving High School Students from the 5	b) GPA of grades 9 and 10	2.620 - 2.831 = -0.211

Procedures for Making Corrections

Districts have the opportunity throughout the year to make current and prior year corrections to performance data reported in the Core Data Collection System. For 2008 June Cycle data to present, updates should be made to the student level data through the MOSIS data collection system. Each year, when the preliminary APRs are generated, districts are notified of the data correction window. Changes made after the data correction window ends are not reflected in Final Annual Performance Reports. Districts being considered for classification by the State Board of Education undergo an internal data review before data are presented to the State Board of Education. The data review identifies potential errors in data, inconsistent data trends, and areas in which the district may need to provide detailed supporting data. Districts must use consistent data collection/reporting methodology for all performance standards. Therefore, when a change in methodology occurs, the district must apply the same methodology to all five years of data being analyzed. When districts identify errors in data not available via the Core Data Collection System, the district must demonstrate that all five years of data have been analyzed for accuracy. Please contact the Accountability Data and Accreditation Section at (573) 526-4886 for more information on making historical data corrections.

NOTES

General

For K-12 districts, 14 fourteen performance standards are measured on the 2009 APR. Districts may meet the additional Bonus Achievement Standard as long as the total number of standards met does not exceed 14. For K-8 Districts, 7 seven performance standards are measured on the 2009 APR. Districts may meet the additional Bonus Achievement Standard as long as the total number of standards met does not exceed 7.

Bonus MAP Achievement Standard

- Bonus standard "met" applies to any "not met" standard
- Districts may not exceed 14 total standards met

Status and Progress measures are applied to performance standards when applicable.

Gap Bonus Points

- For each 9.1*1-9.1*4 MAP standard, districts have the opportunity to earn Gap Bonus Points toward meeting the MAP Standard. The Gap Bonus Points allow for another opportunity for districts to meet each MAP standard.
 - 1. 40 Status Points = Met
 - 2. 50 Status + Progress Points = Met
 - 3. 40 Status + Progress Points + Gap Bonus = Met
- Districts have the opportunity to earn bonus credit toward meeting a 9.1*1-9.1*4 MAP standard, using either a comparison of the MAP improvement of their minority population or their free and reduced-price lunch population with the state majority. If either of the following conditions is considered "Met", the district may meet the MAP standard IF the district has earned at least 40 Status + Progress points.
 - 1. The MAP scores of minority groups that include 20 or more students are aggregated to create an MPI for the minority population. The MAP improvement of the district's minority population from 2008 to 2009 is compared with that of the improvement of the state majority from 2008 to 2009. The bonus provision is considered "Met" if the improvement of the district's minority population is greater than the improvement of the state majority. The Gap Bonus "Met" does not mean the MAP standard is "Met". The district still must earn at least 40 Status + Progress points in order to meet the MAP standard.
 - 2. If the district's free and-reduced lunch population includes 20 or more students, the MPI improvement of those students from 2008 to 2009 is compared with the improvement of the state non-free and reduced-price lunch population. The bonus provision is considered "Met" if the improvement of the district's free and reduced-price lunch population is greater than the improvement of the state non-free and reduced-price lunch population. The Gap Bonus "Met" does not mean the MAP standard is "Met". The district still must earn at least 40 Status + Progress points in order to meet the MAP standard.

Changes for 2009

Standards 9.1*1 – 9.1*4

• Progress points for a 2 over 2 method will be awarded for MAP grade-level data during the fourth year of 4th Cycle since only four years of grade-level data are available

Standards 9.1*5 and 9.1*6

- End-of-Course MAP data are incorporated into the 9-11 grade span MAP standards
 - o Algebra I replaces Mathematics 10
 - o English II replaces Communication Arts 11
 - o Biology I replaces Science 11
 - o The MAP-A remains in place for those students who qualify
- Gap Bonus and Bonus MAP Achievement cannot be calculated during the fourth year of 4th Cycle for Standards 9.1*5 and 9.1*6Bonus MAP Achievement improvement credit will be given for Standards 9.1*5 if the district attains High 1 or High 2 status on the Algebra I assessment during the fourth year of 4th Cycle and in 9.1*6 if the district attains High 1 or High 2 status on the English II assessment during the fourth year of 4th Cycle.
- Grade Span data (2001-2005) will not be used in the 9.1*5 nor the 9.1*6 calculation on the 2010 APR

Science and Social Studies

- Points for Social Studies will not be awarded in 2009
- A Bonus point for 2008 and 2009 grade 5 and 8 Science data and 2009 Biology I data may be awarded. See the Scoring Guide section to see how a district can earn a science bonus met.

Standard 9.6

• The "Hours of Absence" method is the only method used to calculate attendance. The "January Membership" method is no longer used.

Standard 9.7

• The High 2 status measure for percent of Subgroups meeting AYP is adjusted to 50-74.9%.

Performance Worksheets

Updated Performance Worksheets are available on-line at: http://dese.mo.gov/divimprove/sia/dar/.

Procedures for Making Corrections

Please see the section in the document titled "Procedures for Making Corrections" on page 52

Performance Accreditation Levels

Accreditation levels and review types are as follows:

*A district must meet at least one MAP standard to be provisionally accredited.

Accreditation

Status	Acc	credited	Provisional	Unaccredited
Review Status	Mini Review Full Waiver	Targeted Review Limited Waiver	Full Review	Full Review
K-12 Districts	12+ Met	9-11 Met	6-8 Met	1-5 Met
K-8 Districts	6+ Met	5 Met	4 Met	1-3 Met

Note: Bonus points may not be considered in the total met when determining the review type of the district.

Accreditation levels may change as more data becomes available.

Missouri Department of Elementary & Secondary Education Understanding Your APR

2009 4th Cycle APR
DESE 3341-19 9/03

Distinction in Performance

K-12 School Districts must meet at least thirteen out of fourteen performance standards, including all six MAP standards (9.1*1-9.1*6). The Bonus MAP Achievement Standard will be considered in place of a MAP or non-MAP performance standard that is "not met". Gap Bonus Points and Subject Area Bonus Points will **not** be considered for Distinction in Performance.

K-8 School Districts must meet at least six out of seven performance standards, including all four MAP standards (9.1*1-9.1*4). The Bonus MAP Achievement Standard will be considered in place of a MAP or non-MAP performance standard that is "not met". Gap Bonus Points and Subject Area Bonus Points will **not** be considered for Distinction in Performance.

End-of-Course Assessments

- Students taking Algebra I prior to the 9th grade will take BOTH the grade-level MAP and Algebra I end-of-course exams. For APR purposes, the grade-level MAP score will be used in the corresponding standard; the Algebra I score will be used in the Algebra I standard. For AYP accountability, see the *Understanding Your AYP* document.
- 2009-2010 is the first mandatory testing year for the Government end-of-course assessment. Data from this assessment will be incorporated in the APR as a bonus provision in 2010.
- Algebra II, Integrated Mathematics II and III, Geometry, English I, and American History are operational and available at no cost to the district. Data from these assessments will be incorporated into the APR through a bonus provision beginning in 2010. This bonus provision will be awarded based on a combination of successful completion and participation percentage.
- Scores for students taking the Algebra I EOC in a K-8 district will be incorporated into the K-8 district's APR through a bonus provision beginning in 2010.
- The accountability year begins with the summer administration of the end-of-course assessments.
